

Hand moulded bricks.

Ceramic roof tiles.

Wall tiles.

Clay pavers.

Advice group: analysis & advice.

A high-quality team of consultants with all expertise.

Rob Mentink, Edwin van Ommeren, Hans van Wijck, Stan Aben, Ronny Lugtenberg, Frits de Graaf, Coen van Mosseveld, Wilco van den Berg.

Measuring group: process, environment and Occupational Health & Safety (OH&S) measurement.

A specialized team to handle all measurements on site.

Frits de Graaf, Rob Mentink, Hans van den Brink, Harro Steenbergen.

Laboratory: studies.

A top team of laboratory technicians with the best equipment under direction of head of department Ineke Geist.

Examination on ceramics and advice with knowledge and experience.

TCKI is an independent knowledge and technical support centre for more than 60 years for mineral raw materials and building materials production. It also has the necessary expertise with respect to the corresponding production techniques and processes.

TCKI your partner for the best products.

We have in-house expertise as far as the composition of your raw materials is concerned, as well as how manufacture of ceramic building materials needs to be implemented in order to meet your requirements.

Many of our laboratory research and test group services are accredited by the Dutch Council for Accreditation (RvA, L 254).

TCKI has gained the trust of many manufacturers and of those who purchase ceramic building materials. TCKI stands for integrity, innovation, the highest quality and speed of service provision and laboratory studies.

We, better than anyone else, are able to demonstrate the properties of your products and their quality using accredited measuring methods. Our reports are in English, German, French or Dutch so results can immediately be used in your market.

More value and lower costs.

Knowledge of the manufacture of building ceramics is our core competence. Our expertise will enable you to make improvements focused on quality, quantity and cost savings.

TCKI assists you in studying various ideas and opportunities. TCKI carries out process measurements, characterises raw materials and products, assists with projects and talks with suppliers, and provides consultation. TCKI will help you raise your company to a higher level.

We would be happy to further assist you.

- Characterisation of ceramic raw materials and additives
- Properties and Quality of ceramic products and building materials
- Leaching of building materials
- Antislip/antiskid resistance properties of floor or road materials
- Sampling of fine particulates and other substances
- Energy measurements and energy savings
- Noise measurements and calculations
- Environmental measurements and permits
- Production control and quality assurance
- Ceramic manufacturing technology and technique
- Production control and energy savings
- Expertise with regard to building material damage
- Workplace conditions and occupational, health and safety (OH&S)
- Engineering, calculations and drawings
